Mission | Vision | Values

Our Mission

Improve the health and wellbeing of people and communities in Africa using science and innovation

Our Vision

To be a leading African health management and research organisation that promotes health and wellbeing

Our Core Values

1. Commitment

We are committed to our clients and partners

2. Responsive

We tailor strategies to each situation and seek creative approaches to meet clients' needs, rather than relying on conventional responses to problem solving.

3. Collaborative

Effective teamwork among staff, clients, funders, and partners is critical to our internal operations and external relationships. Our work depends on a sense of shared responsibility, and we believe that decision making, information sharing, and collaboration are essential to our success.

4. Quality Oriented

We have a strong work ethic that always meet our customer every quality expectations and collaborate with the best experts in the industry to deliver accordingly

5. Reliability

We always seek to strive to deliver on our promises on time

Who do we serve?

We work with government agencies, the private sector, and local non-profit and civil society organizations to achieve change in communities and health systems.

Governments

We work with governments in capacity building, gaining better clarity on performance of human resources and new services

Donors

We assist donors in improving monitoring and evaluation of investments for better future decisions

Non Governmental Organisations (NGO)

We work with NGOs in capacity building, enhancing project delivery and improving use of data driven decision making

Non Profit Organisations (NPO)

We work with NPOs in capacity building, enhancing project delivery and improving use of data driven decision making

Community Based Organisations (CBO)

We work with CBOs in capacity building, enhancing project delivery and improving use of data driven decision making

Private Healthcare Providers

Improve return on investments (ROI) by conducting market research to determine new niches, identifying and developing innovative best practices to serve the new markets.

Our Solutions

From community based organisations to private practitioners, we strive to help clients make communities healthier and more capable of providing effective, optimal and affordable healthcare solutions.

Epidemiological and Evaluation Research
